ascending
descending
specific flow [persons/(m s)]
density [persons/m²]
empirical target 1.22
conservative target 1.10
empirical target 1.25
conservative target 1.10
before the calibration: level spacing (T = 0.3 s)
calibrated stair spacing (default; T up 0.625 s, down 0.65 s)
conservative stair spacing (T 0.75 / 0.78 s)
Burghardt et al. (2013): measured maxima
Green Guide (2018): 66 persons/(m min)
